Technology

- Autonomous flight
 - Realtime waypoint generation
 - Reproducible flights
 - 360° coverage of blades
- Reproducible data
 - Automatic accurate placing of highres pictures on 3D blades
 - Centimeter-Level RTK Accuracy combined with High Accuracy Heading

PENDING**

Non-Contact Lightning Protection Test - Patent-Pending

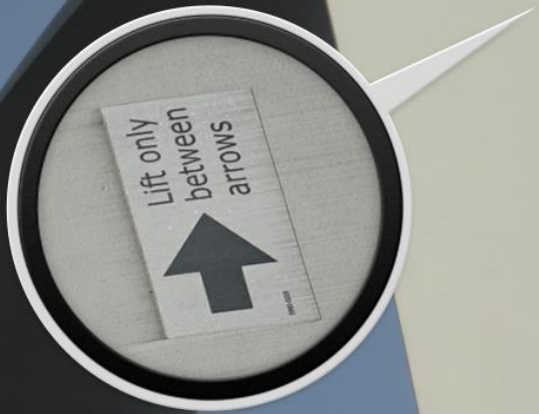

The electric field is always upright to metal. This fact enables the analysis of direction and intensity of the electric field and can prove the existence of an intact earth connection safely.
